Velkscala 1.0: Neolithic Demographic Transition (NDT) Empirical Audit

10000 BC - 1000 AD | 5 Agricultural Origins & 19 Subnational/National Geocodes

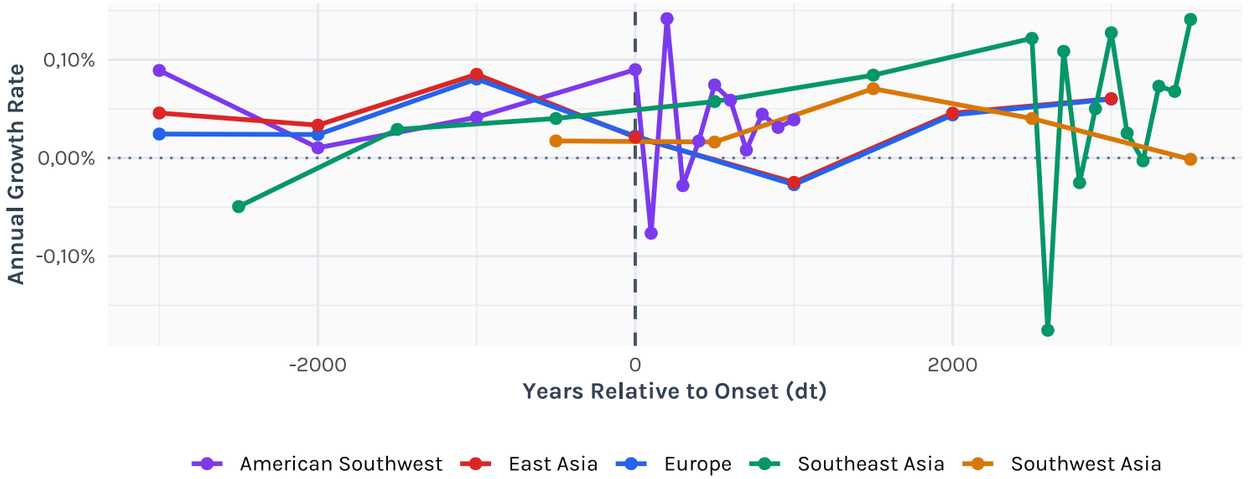

Bocquet-Appel Juvenile Proportion p(5-19) / p(5+)

Aligned to regional agricultural onset (dt = 0)

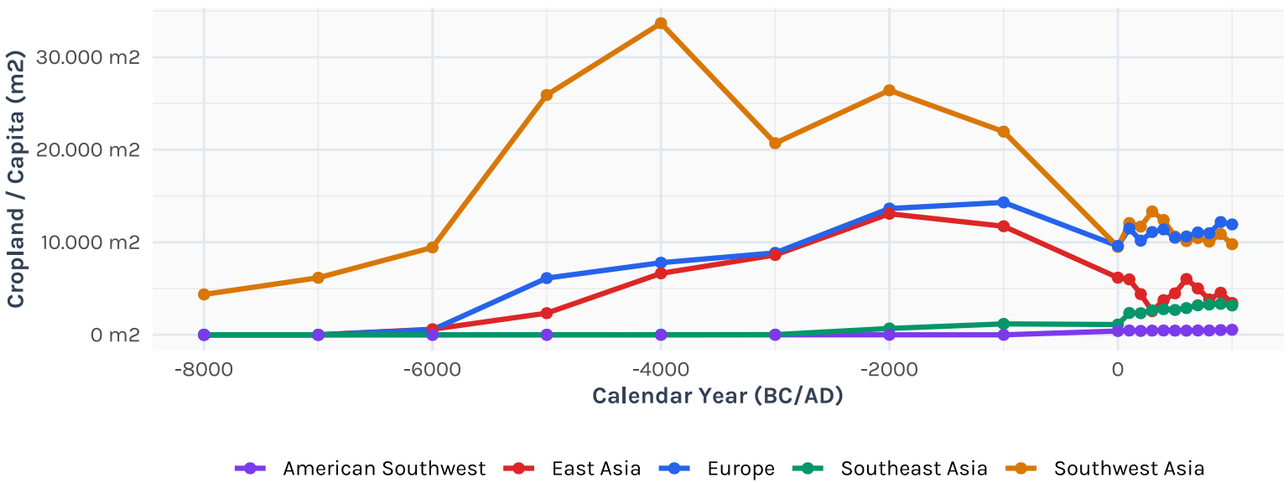

Annualised Population Growth Rate (r %/yr)

Transient Neolithic boom vs. LBK boom-bust cycles

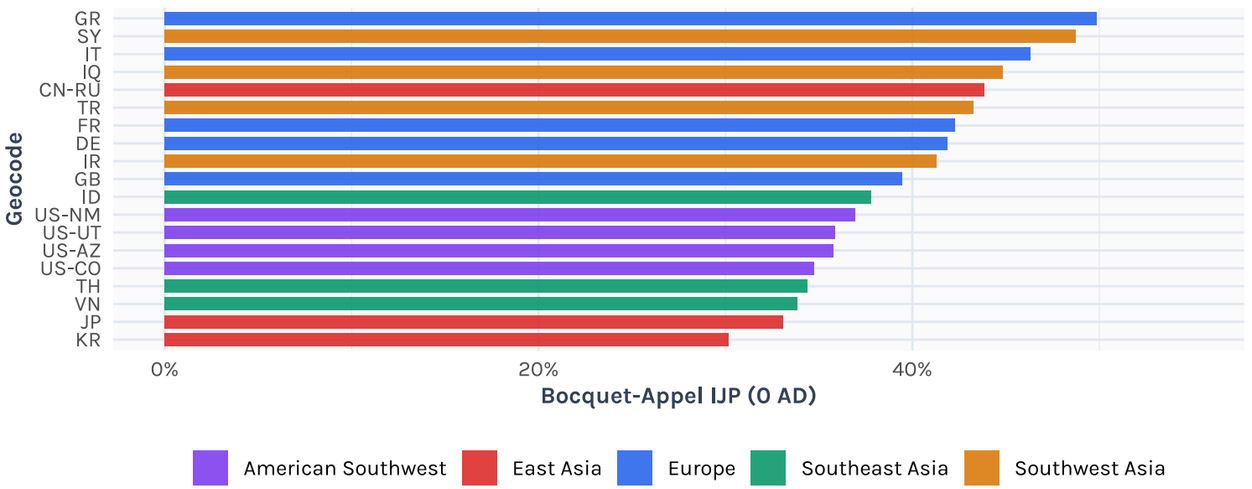

Per-Capita Arable Cropland Trajectory (8000 BC - 1000 AD)

HYDE 3.3 / Velkscala 1.0 agricultural intensification

Spatial Age-Structure Differentiation (0 AD Benchmark)

Endogenous per-geocode Bocquet-Appel IJP variation across 19 jurisdictions

Priors: Bocquet-Appel (2002, 2008), Shennan et al. (2013), HYDE 3.3 & Stadester/Velkscala 1.0 (2026).
